Commercial Value = Nilai Komersial

- **Sampaikan mesej jualan** dengan pantas.
- **Trigger emosi** yang tepat (nak beli, nak tahu lebih, rasa percaya).
- **Menggerakkan tindakan** – klik, PM, daftar, beli.
- **Seiring dengan positioning brand** – premium, friendly, trusted.

Bukan sekadar gambar cantik, tapi gambar yang “sales-driven”.

Mesej Jelas	Sampaikan apa yang dijual, kenapa penting
Emotional Trigger	Gerakkan hati prospek
Consistent Branding	Maintain tone warna, style
Strong CTA	Arahkan tindakan spesifik
Clean Layout	Tak serabut, mata flow semula jadi

Kenapa Commercial Value Ini Penting?

- **Attention span pendek** — orang scroll laju, gambar mesti stopkan mereka.
 - **Persaingan sengit** — gambar kena terus stand out dalam lautan iklan lain.
 - **Facebook & IG algorithm** suka gambar yang dapat banyak interaksi awal (engagement boost visibility).
 - **Orang beli sebab emosi**, bukan sebab logik semata.
-

Strategi Praktikal: Cara Buat Gambar High Commercial Value

1. Fokus Satu Mesej Utama

- 1 gambar = 1 mesej clear.
- Jangan campur banyak benda.

- Contoh: "Stabilkan Tekanan Darah" ✔ (BUKAN "Stabilkan Darah + Kurus + Cerah + Kaya")

2. Gunakan Visual Hook Kuat

- Produk close-up.
- Ekspresi wajah happy/relief.
- Before/After simple split.
- Infografik mudah scan.

3. Trigger Emosi Tertentu

Emosi	Contoh Visual
Excitement	Wajah happy, letupan warna
Trust	Lencana "Lab-Tested", review stars
Fear of Missing Out	Timer, Limited Offer badge
Hope	Transformasi kulit/glow-up

4. Layout Clean & Flow Natural

- Mata orang perlu boleh baca "flow" gambar dari:
 - Hook → Produk → Benefit → CTA
- Pastikan breathing space – jangan serabut.

5. Saiz Gambar Standard FB/IG Ads

- Square: **1080 x 1080 px** (1:1)

- Portrait: **1080 x 1350 px** (4:5)
 - Landscape: **1080 x 566 px** (1.91:1)
-

Why These Techniques Work

- **Visual Hierarchy:** Pandu mata user ikut jalan cerita iklan.
 - **Emotional Resonance:** Orang beli sebab mereka rasa "ini untuk aku".
 - **Contrast & Color Psychology:** Tarik perhatian + evoke feeling (rujuk teori warna).
 - **Speed of Understanding:** Prospek faham produk dalam 1 saat — critical!
 - **Mobile Optimization:** 90% view dari phone, design mesti mobile-first.
